5. Using the camera

5.1 Installing the batteries

- 1. Open the battery door.
- Insert 2 x AAA alkaline batteries into the camera compartment.
 Close the battery door.

Note:

Make sure that the batteries are inserted in the right directions (as marked in the diagram above).

5.2 Inserting a memory card (not included)

This camera has no built-in internal memory. The memory can be gained with a MicroSD memory card (not included).

Follow the instructions below to insert the optional MicroSD memory card into the camera.

- 1. Turn off the camera first.
- 2. Open the battery door (please make sure the battery door was unlocked before open).
- 3. Insert the MicroSD card into the camera.

Notes:

- There is only one right direction to insert the MicroSD memory card into the slot. Do not
 force the card into the memory card-slot, which may damage both the camera and the
 MicroSD memory card
- The MicroSD memory card must be formatted before taking photographs. See the following section for more information.

5.3 Formatting the memory or microSD card

- Press the Menu button () in PHOTO or VIDEO mode.
- 2. Select the setup mode by pressing the Right button.
- Select the format icon by pressing the W (∨) button and press the Shutter button to confirm.
- 4. Press the Shutter button to format the SD memory card.

5.4 Setting the resolution

The camera can be set to different resolutions.

 Press the Menu button () in PHOTO mode, select the resolutions icon by the W () key and press the Shutter to confirm.

Available resolutions:

VGA (640 x 480), 3M (2048 x 1536),

5M(2592x1944); 8M(3264x2448); 14M=4320x3240; 20M=5184X3888.

Six different resolutions will be displayed. Select the desired resolution by using the Up or Down button and press the Shutter button to confirm the selection.

5.5 Taking photos

- 1. Turn on the camera.
- Depending on the distance to the object being photographed, use macro switch to adjust the distance.
 - Set the macro switch to macro mode (**3**) if you wish to take a close-up photograph. (11cm–18cm):
 - Set the macro switch to normal mode () if you wish to take a video or a photo of surroundings or people (0.5m infinity).
- 3. If you are not sure if there is enough lighting, turn on the automatic flash (\$A) by pressing the Flesh button (If the batton power is too low the flesh went be estimated)
- the Flash button. (If the battery power is too low, the flash won't be activated).
- 4. Use the LCD screen to aim at the object you wish to take photographs of.5. Press the Shutter button and wait until the LCD display turns on again.

Cautions

- Taking pictures for fast-moving object is not recommended.
- 2) Image may be distorted when taking pictures in a moving vehicle.

5.6 Zooming in and out

The camera can zoom in up to 4 times.

Zoom in or out by pressing the Up or Down button, a number will appear on the display, 4.x is the maximum zoom ratio.

5.7 Taking a self-portrait shot using the front monitor

If you want to take a photo of yourself, you can simply use the front LCD screen. Follow the steps below:

- 1. Press the Monitor switching button to switch to the front monitor.
- 2. Use the front monitor as a viewfinder to aim at yourself.
- 3. Press the Shutter button to take a photo of yourself.

5.8 Self-timer setting

You can also use the self-timer function when you take a photograph of yourself or when you take a photograph without flash of an object. To avoid shaking of the camera a tripod is recommended.

- Set the camera to photo mode.
- 2. Press the Menu button (). The menu will appear.
- 3. Press the **W** (\checkmark) button to select Self Timer and confirm by pressing the Shutter button.
- 4. Press the **W** () button to select the "On" option
- 5. Press the Shutter button to confirm. The self-timer function is now ready for use.
- . Aim at the object you wish to take photos of.
- 7. Press the Shutter button to take a photograph.

 The photo will be taken after the timer reaches the delay time of 10 seconds. The camera will beep during the delay time.

5.9 Recording video clips

- . Press the Mode button to select the video clip mode ().
- For setting the resolution, press the Menu () button and select Resolution, then press
 the Shutter button to confirm. Two resolutions will be displayed.
 VGA (640 x 480). OVGA (320 x 240).
- Press the Shutter button to start recording videos, press the right button to pause and press the Shutter button again to stop recording. The video clip will now be saved as an AVI file in the MicroSD memory card.

5.10 Playing back photos

- 1. Press the Playback () button to enter the Playback mode.
- The last picture or video clip taken will be displayed. Press the W (✓) to enter the thumbnail mode. Press the Left /Right /Up/Down button to select the desired picture, and press the Shutter button to view.
- 3. In full screen display, press the **T** (\wedge) button to zoom in the photo.
- To shift the image in zoom-in mode, press the Shutter button and then use the Mode/Menu/Left/Right buttons.
- 5. Long press the Menu ()) button in Playback mode until the menu is displayed. Select Slide Show and set up the desired slide show way. Press the Shutter button to confirm. The pictures saved in the MicroSD card will be displayed in sequence automatically. To stop slide show, press the Shutter button.
- 6. Long press the Menu () button in Playback mode until the menu is displayed. Select Photo Effect and press the Shutter button. Select the desired effect by pressing the up/down button and press the shutter button to confirm. The image will be saved as a separate image.

5.11 Protecting photos/videos

To lock up the photos/videos and make them under protection from being deleted by the camera, follow the instructions below.

Follow the instructions below to protect photographs/videos.

- 1. Press the Playback () button to get into Photo playback mode.
- 2. Press the Left or Right button to select the photograph/video clip to be protected.

M-Shutter	Yes	
LCD display	2.7+1.8" TFT color display	
White balance	Auto / Daylight / Cloudy / Fluorescent / Tungsten	
Video Frame Rate	30fps@VGA / 30fps@QVGA	
External Storage Media	MicroSD card, not included (supports up to 32GB)	
File format	Picture: JPEG, Video: AVI	
Self timer 10 seconds		
PC interface	USB 2.0	
Power source	2 x AAA alkaline batteries	

8. System requirements

Operating system	WinXP (SP3), Vista32/64 Win7&Win8 32/64 and Mac OS X 10.6.8 or above
CPU Pentium III or above	
RAM	At least 64MB
Interface	USB port
CD 4x speed CD ROM or above	

9. Troubleshooting

Problem	Cause	Solution
Cannot turn on the camera	Low battery power. Batteries placed at wrong polarities.	Replace or install the batteries correctly.
Photos can not be saved when taking pictures.	The memory card hasn't been formatted properly.	Format the memory card in setup mode of the camera. Please refer to section 5.3.
Cannot find removable disk after connecting the camera to the computer.	Connection failure.	Make sure all cable connections are secured and restart the computer if necessary.
Flash does not work.	Battery power is too low.	Replace with new 2x AAA alkaline batteries
Batteries used up very fast.	Old, used up battery	Replace with new 2 x AAA alkaline batteries
Blurry photos	The camera is not held steadily The lens of camera is dirty.	Hold the camera steadily until it beeps when taking a photo. Clean the lens with soft and dry cloth.

Before using your camera in the water please verify that all lids and locks are tightly closed and sealed.

After using the camera in water please let it dry.

The camera should not be exposed to high temperatures and humidity differences to avoid condensation behind the lens.

Open the battery compartment only when the camera is dry.

HOW TO OPEN THE BATTERY COMPARTMENT OF THE CAMERA

Push the release lever toward the rear of the camera.

At the same time place your fingernail under the cover in the middle of the camera and slide the compartment to the outside.

The battery compartment cover can now be hinged upward.
